Art Unit: 2145

Restriction

1. Claims 39-79 are presented for examination.

- 2. Restriction to one of the following inventions is required under 35 U.S.C 121:
 - Claims 39-55, drawn to computer-computer direct memory accessing, classified in class 709, subclass 212.
 - II. Claims 56-75, drawn to computer network managing, classified in class709, subclass 223.
- 3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate method such as it is useable to computer-computer direct memory accessing which lacked features of the second group of claims, e.g., computer network managing, classified in class 709, subclass 223. See MPEP 806.05(d).

Invention II has separate utility such as it is usable by any system which lacked features of group I of claims; e.g., computer-computer direct memory accessing, classified in class 709, subclass 212.

4. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose because these groups would require different searches on PTO's classification class and subclass e.g.

Art Unit: 2145

a) the Group I search (39-55) would require use of search classified in Class 709, subclasses 223, (which would not be required for the Group II);

- b) the Group II search (claims 55-75) would require use of search Class 709, subclasses 212, (which would not be required for the Group I), therefore restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. Any inquiry concerning this communication of earlier communications from the examiner should be directed to Adnan Mirza whose telephone number is (571) 272-3885. The examiner can normally be reached on business days during normal business hours.
- 6. The examiner can normally be reached on Monday to Friday during normal business hours. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)-272-3933. The fax for this group is (703)-746-7239. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 7. Information regarding the status of an application may be obtained from the Patent
 Application Information Retrieval (PAIR) system. Status information for published applications
 may be obtained from either Private PAIR or Public PAIR. Status information for un published
